

PCA plot showing PC1 (49.067%) on the x-axis and PC2 (25.812%) on the y-axis. The plot displays three distinct clusters of data points, represented by orange circles. The top cluster, labeled 'None', consists of a single solid orange point at approximately (30, 140). The bottom-left cluster contains several solid orange points and one open circle, all clustered near the origin. The bottom-right cluster contains a single open circle labeled 'None' at approximately (205, -15).
